Internship (m/f/div) Sustainability at RD&I (Research, Development & Innovation)

Germany, Evonik sites: Marl (favorite), Hanau, Essen

What we offer

Working in one of the world's leading specialty chemicals companies? Of course! At Evonik, a world full of opportunities awaits you. Our mission is to make people's lives better - day after day. That's what we mean by "Leading Beyond Chemistry". Evonik makes tires more fuel-efficient, mattresses more elastic, tablets more effective, and animal feed healthier. You will work on exciting and challenging topics together with a team in an ultra-modern, innovative and creative environment. Intensive on- and off-the-job training, mentoring programs, work-from-home possibilities and performance related pay are just a few of the benefits you can expect.

Tasks / Responsibilities

Support in sustainability projects, e.g. on the following topics:

- Research, analysis and preparation of scientific literature and/or market studies in the field of sustainability
- Analysis of competitors with regard to sustainability goals and measures
- Evaluation of sustainable raw materials
- EU Green deal - Fields of action for the chemical industry

Requirements

- Completed basic studies in materials science, chemistry, physics, chemical engineering, process engineering or mechanical engineering
- Initial experience in the field of sustainability, e.g. on lifecycle management, sustainable raw materials or processes
- Confident English language skills
- Basic software knowledge (MS Office)
- Independent, result-oriented and team-oriented way of working

Your application

The position is limited to 3 - 6 months. Please share CV, cover letter, desired start and end dates and current transcript of records in pdf format. Please apply 3-4 months before your desired start date.

An internship is a supplement to a course of study. Once you have finally completed your studies, an internship is not possible.

To ensure your application is processed as quickly as possible and to protect the environment, please apply online via our career portal at careers.evonik.com
